Not illustrated. 1922 Excerpt: .on the mere presence of a few fusiform bacilli and spirochetes in smears. These measures threatened to entirely tie up the activities of one camp and were ordered discontinued on the basis that our knowledge does not justify such a radical program. The situation must be handled by treatment, hygiene and sanitation rather than carrier work at present. TUBERCULOSIS The term carrier is sometimes used in tuberculosis to indicate an apparently healthy person who discharges tubercle bacilli. Such true convalescent carriers may exist who have a general immunity with a small unhealed lesion somewhere in the body. But, in general, such individuals should be considered as mild or chronic cases. In view of the nature of the disease and of its mode of spread, more good will be done to the individual and to the group by emphasizing cases rather than carriers. On the other hand,...
