Annals of the Astronomical Observatory of Harvard College Volume 59 (Paperback)

By Harvard College Observatory

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1912 Excerpt: . 79, with the intention of making the photographic and photometric scales coincide for Class A. The photometric magnitude of Polaris is 2.12. Therefore, the adopted difference for Class F, to which Polaris belongs, is +0.50. The mean of the differences for 8 stars of Class A or Ap, taken from Table XV, is--0.02. This corresponds to a difference of +0.52. The difference for H. R. 2693, Class F8p, is +0.51. These agree closely with the adopted value. By reference to the straight line in Figure 5, it will be seen that the two scales coincide at A 2, the middle point of the second group. For point A, the reading is--0.07, which corresponds to a difference of +0.57 for Class F 8. The interval between the straight line and the curve for point F 8 indicates a value of +0.60. These values seem to indicate...
