

Energy in a Changing Climate

By Martin Nicholson

Rosenberg Publishing. Paperback. Book Condition: new. BRAND NEW, Energy in a Changing Climate, Martin Nicholson, This book is written for the non-technical reader who has an interest in acquiring a better understanding of energy and its impact on climate change. It provides some much needed background on energy sources and their limitations and describes the links between energy and climate change. It discusses various energy based solutions to climate change and considers the financial consequences of these solutions for both the economy and the energy consumer. It provides the reader with a clear understanding of commonly used (but often not clearly explained) terms like 'renewable energy', 'base-load power', 'peak oil', 'biofuels', 'global warming', 'greenhouse gas emissions', 'energy security', 'emissions trading', 'carbon taxes' and 'carbon offsets'. It offers practical solutions to ways that the energy consumer can save energy in the home, workplace and on the road. There are widely differing views about solutions to energy and climate change. This book provides an unbiased look at both sides of this debate and addresses what still needs to be done before we can return to an all renewable energy economy. Some conservationists see the problem as relatively straightforward requiring deep cuts...
