

# I. the Syzygetic Pencil of Cubics with a New Geometrical Development of Its Hesse Group, Johns Hopkins II. the Complete Pappus Hexagon Requirements (Classic Reprint) (Paperback)

Filesize: 2.89 MB

## **Reviews**

*This publication will be worth purchasing. It really is written in simple terms instead of difficult to understand. It has been designed in an exceptionally simple way and is particularly only right after I finished reading this ebook in which basically modified me, alter the way I believe.*

*(Prof. Loyce Runolfsson Jr.)*

## **I. THE SYZYGETIC PENCIL OF CUBICS WITH A NEW GEOMETRICAL DEVELOPMENT OF ITS HESSE GROUP, JOHNS HOPKINS II. THE COMPLETE PAPPUS HEXAGON REQUIREMENTS (CLASSIC REPRINT) (PAPERBACK)**

The Syzygetic Pencil of Cubics With a New Geometrical Development of Its Hesse Group, Johns Hopkins II. The Complete Pappus Hexagon Requirements** 1. The course of lectures by Prof. Frank Morley during the winter of 1903-4 on cubic curves suggested this dissertation and prepared me to carry on the research. The trend was largely determined by an incidental question by Prof. A. Cohen as to the groups involved in the system of conics which I had just presented to the Mathematical Seminary. The interest and valuable suggestions of Dr. A. B. Coble in the carrying on of the work are gratefully acknowledged. 2. The close connection between the Hesse group and the syzygetic pencil of cubics makes it necessary to say at least something about this pencil of curves. Without attempting even an outline of the theory, I present in Section I. only such matter as is needed later, besides some new facts concerning the pencil and a figure showing the appearance of some noteworthy and specially related cubics of the pencil. No figure seems ever to have been published except that in connection with the paper of Prof. Morley in the Proceedings of the London Math-Society, Ser. 2, Vol. 2, Part 2, which shows arbitrarily selected cubics. The initial and all but the closing work leading to that figure was done by me. Therefore, I present a figure of the pencil herein, also one of the corresponding polar-reciprocal range of line cubics. Section II. shows how to derive a closed system of thirty-six conics analogous to the conic of Section I. as to which the pencil and range are polar-reciprocal. It also discusses...
