Reviews

The book is great and fantastic. It is written in straightforward words and phrases rather than difficult to understand. You won't really feel monotony at any time of your respective time (that's what catalogues are for regarding should you question me).

QUARTERLY CONFERENCE OF EXECUTIVE OFFICERS OF STATE INSTITUTIONS WITH THE STATE BOARD OF CONTROL August 3, 1909 HOW BEST TO SECURE MAXIMUM YIELDING HERDS OF COWS FOR STATE INSTITUTIONS. PROF. ANDREW BOSS, MINNESOTA EXPERIMENT STATION. The matter of securing maximum yielding herds for our state institutions is worthy of serious thought and consideration. When the large number of cows involved is considered, and the further fact that it costs as much to shelter and care for a cow of low producing capacity as one of high producing capacity and nearly as much to feed her, the magnitude of the proposition may be realized. There are in all approximately 750 cows owned by the institutions, under the authority of the Board of Control. A difference in yield of only 25 pounds of butter per cow means a total of 18,750 pounds of butter, worth at 25 cents per pound, 4,687.50 yearly, or enough to buy a full herd for any one of the institutions each year. The result will be practically the same where the difference in figures is confined to the milk instead of the butter product. It is not my purpose to enlarge on the need of securing large yielding herds but rather to suggest a feasible and practical plan of obtaining results. The preliminaries are practically settled in this case as to the objective. It is clearly your desire to work toward a heavy milk yielding herd. It is settled also as...
